

# Healthcare Solutions

Ensuring patient safety should be the primary concern of healthcare professionals. Honeywell is the first company in the automatic identification and data collection (AIDC) industry to introduce disinfectant-ready housings, a healthcare solution designed specifically to address this concern.

Excellent at resisting the harmful effects of harsh cleaning agents used commonly in healthcare environments, Honeywell now offers products that are built to withstand frequent exposure to any of our recommended cleaning solutions.

Data collection hardware is traditionally made of amorphous plastics, such as PC/ABS. These plastics become susceptible to cracking after repeated exposure to harsh chemicals. Cracks can lead to hardware malfunction and more serious consequences, such as the corrosion of electronic circuitry and electrical fires. Healthcare professionals that use traditional data collection hardware often place their hardware in plastic bags to reduce the likelihood of contamination. This practice results in poor scanning performance. Disinfectant-Ready Housings (DRH) allows healthcare professionals to execute the 5 rights of patient safety, while minimizing the risk of spreading infectious diseases. Several Honeywell solutions including the 4820HD, the 4600GHD and the Dolphin® 9900HC Mobile Computer are now available with DRH. Protect your patients and your hardware investment by choosing Honeywell solutions with Disinfectant-Ready Housings.

**Links to these DRH Products → are listed below.**

# Honeywell

## Products available with white Disinfectant-Ready Housings (DRH):

\*Note: These products are also available in “Standard Versions” (without Disinfectant-Ready Housings) on our web site, at a lower cost.

Check with your Infection Control Department regarding compliance requirements.

4600GHD – USB Corded 2D Imager

4820HD – Wireless 2D Imager

Dolphin® 9900HC  
Mobile Computer w/ 2D Imager

## Recommended Cleaning Solutions

### • 4600G and 4820 scanners:
